1. BACKGROUND

The development of human capital is viewed as a prerequisite for an inclusive and sustainable economic growth. Moreover, it is increasingly seen at the cornerstone for both advanced and emerging economies seeking to speed up economic development and address the challenges posed by the global economic crisis.

From the development perspective, the labor plays critical role for Moldova's socio-economic modernization, as it is one of the few resources available in the country. However, long hailed as a country with abundant labor resources, Moldova has increasingly found that labor (mostly as quality, but also quantity) has become its major development constraint, with Moldova's labor endowment suffering considerably in the last two decades. The prospects for the quantity of labor force available in the future are not necessarily brighter given continuous outward migration and dire demographic outlook.

This loss in the labor force was only partly offset by the improvements in the labor productivity, which remained the lowest in the CEE and Western CIS region. Capital and skill endowments are amongst chief determinants of the labor productivity. In their turn, the skill endowment is largely dependent not only on the quality of the country's education system, but also on training programs

provided by various institutions.

The Innovative Entrepreneurship for Sustainable Employment Project was designed to establish career centers in four most important regions of Moldova with the goal to train and assist qualified unemployed and graduates in obtaining relevant employment in Moldova, preventing brain-waste, as well as brain-drain, and supporting economic growth of the country. One training center was established in Chisinau and three centers will be established in the regions of Moldova.

For the training Centre to be established in Rezina, a Coordinator of the Centre, a carrier advisor and an assistant will be recruited.

For detailed information about the focus of the SYSLAB Project, please refer to Annex 1 – Terms of Reference.
