UN Women staff will respond in writing or by standard electronic mail and will send written copies of the response, including an explanation of the query without identifying the source of inquiry, to all consultants.

1. BACKGROUND

UN Women, grounded in the vision of equality enshrined in the Charter of the United Nations, works for the elimination of discrimination against women and girls; the empowerment of women; and the achievement of equality between women and men as partners and beneficiaries of development, human rights, humanitarian action and peace and security.

The work of UN Women in Moldova is guided by its new [Country Strategic Note for 2018-2022](#), aligned with the [Republic of Moldova–United Nations Partnership Framework for Sustainable Development 2018–2022](#), the [Global Strategic Plan of UN Women for 2018-2021](#), the [National Strategy on Gender Equality for 2017-2021 \(NSGE\)](#), and aims to contribute to the gender-responsive implementation of the 2030 Agenda for Sustainable Development. The Strategic Note focuses on three main areas: 1/strengthening women's participation in politics and decision making, 2/economic empowerment of women and 3/ending violence against women and girls. To achieve progress under these areas, UN Women works with variety of national and international partners and as part of different national and regional initiatives

Violence against women (VAW) is one of the most systematic and widespread human rights violations in the world. In Moldova, as in the region and around the world, it affects individuals regardless of context, culture, or socio-economic status, with serious repercussion for women, their families, and society. Despite progress, including in the area of legal and policy reforms, research, and different awareness raising campaigns, the prevalence of VAW in Moldova remains high. According to the National study "Violence against Women in the Family", carried out by the National Bureau of Statistics, and commissioned by UN Moldova in 2011, 63% of women experienced some type of violence (psychological, physical or sexual) from husband/partner during her lifetime, and one in ten women mentioned that she experienced economic violence at least once in her lifetime. Rural women, elderly women, and those separated or divorced reported the highest prevalence rate of multiple forms of violence¹.

¹ „Violence against Women in the Family in the Republic of Moldova”, 1st Edition, 2011 (<http://www.statistica.md/pageview.php?l=en&id=3626&idc=350>)

As a response to this challenge, the State has undertaken the initial steps at policy, legislation as well as implementation levels. The Law No 45-XVI on Preventing and Combating Domestic Violence (DV) from 01.03.2007 is an important legislative base for combating the phenomenon in Moldova. The Law provides an institutional framework detailing the tasks of the competent authorities, provides for the creation of centres/services for the rehabilitation of victims and aggressors, for a mechanism for settling DV cases and protection for victims of DV, including by using protection orders and punitive measures against the aggressor.

At the policy level, Government adopted the first ever [National Strategy on Preventing and Combating Violence against Women and Domestic Violence for the period 2018-2023 and its associated Action Plan for the period 2018-2020 \(Government Decision nr.281 from 03.04.2018\)](#). The National Strategy aims at providing a systemic approach to violence against women and domestic violence phenomenon for ensuring effective and prompt response from relevant stakeholders in cases of violence. The National strategy has a specific objective to strengthen the systems for collecting, analysing and disseminating sectoral statistical data, and ensure regular monitoring of the dynamics of violence against women and domestic violence.

The collection and analysis of sectoral statistical data is still challenging the institutions with responsibilities in VAW area. The National Bureau of Statistics only in November 2017 has approved the Annual Statistical Survey that includes a set of indicators to be collected annually from the local public authorities of tier I / territorial social assistance structures / specialized public service providers. Following the first reporting exercise, it was revealed that collected data is not reliable and could not be presented as official statistics.

However, in order to ensure the collection of a reliable and comparable statistical data on VAW area a thorough analysis of the indicators is needed. For this purpose, UN Women plans to recruit a national consultant to support the Ministry of Health, Labour and Social Protection in analyzing and improving the statistical data on domestic violence collected from the local public authorities and specialized public service providers and in developing a detailed reporting guide for the respective institutions.

2. SCOPE OF WORK, RESPONSIBILITIES AND DESCRIPTION OF THE PROPOSED WORK

The major scope is to undertake a detailed analysis of the Annual Statistical Survey on domestic violence to improve the quality of the statistical data collected from the local public authorities of tier I / territorial social assistance structures / specialized public service providers and to develop a detailed reporting guide / methodology for respective stakeholders.

For detailed information, please refer to Annex 1- Terms of Reference.
