1. BACKGROUND

The Government of Moldova explicitly acknowledges that decentralization represents an essential item on the reform agenda of the country. The goal is to provide quality services to women and men equitably - including the rights of persons from vulnerable groups - through building autonomous and democratic local governments, able to manage efficiently their responsibilities. Thus, on April 5, 2012 the Parliament of the Republic of Moldova adopted the National Decentralization Strategy that represents the main policy document in the field of local public administration and establishes the national mechanisms to ensure genuine local autonomy. Prior to the approval of the Strategy, the Government has benefited from the support provided by the Joint Integrated Local Development Programme/JILDLP implemented by UNDP and UN Women and funded by the Government of Sweden and UNDP. Given the stringent need to further advance the implementation of the Decentralization Strategy, and building on the successful cooperation with the Joint Integrated Local Development Programme, the State Chancellery together with United Nations have designed a new Programme phase to support the implementation of the Decentralization Strategy at policy and local levels.

The National Decentralization Strategy is the main policy document on local public administration that offers a general strategic framework, the main principles and the national mechanism for decentralization and ensuring local autonomy in Moldova. At the same time, apart from the specific objectives, the process of decentralization in Moldova applies a human rights based approach, promoting gender equality and human rights for women, man and communities, social inclusion for vulnerable and marginalized groups, as well as ensuring equal chances and dignity for all.

For a successful implementation of the decentralization reform, the action plan of the National Decentralization Strategy envisages the development of the sectoral strategies for decentralization that will

guide the decentralization reform in various domains. According to the decision of the Parity Commission from July 2, 2013 all sectoral strategies have to be developed by the end of 2013.

In this context, a working group for decentralizing public services related to the environment was created under the auspices of the Parity Commission. The working group is hosted by the Ministry of Environment which ensures the secretariat and facilitates the activity of the working group, as well as ensured the correlation of the decentralization policy with other relevant documents in this field.
