### 19. Opening of proposals

The procuring entity will open the Proposals in the presence of a Committee formed by the Head of the procuring UNDP entity.

### 20. Clarification of proposals

To assist in the examination, evaluation and comparison of Proposals, the Purchaser may at its discretion, ask the Offeror for clarification of its Proposal. The request for clarification and the response shall be in writing and no change in price or substance of the Proposal shall be sought, offered or permitted.

### 21. Preliminary examination

The Purchaser will examine the Proposals to determine whether they are complete, whether any computational errors have been made, whether the documents have been properly signed, and whether the Proposals are generally in order.

Arithmetical errors will be rectified on the following basis: If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected. If the Offeror does not accept the correction of errors, its Proposal will be rejected. If there is a discrepancy between words and figures the amount in words will prevail.

Prior to the detailed evaluation, the Purchaser will determine the substantial responsiveness of each Proposal to the Request for Proposals (RFP). For purposes of these Clauses, a substantially responsive Proposal is one which conforms to all the terms and conditions of the RFP without material deviations. The Purchaser's determination of a Proposal's responsiveness is based on the contents of the Proposal itself without recourse to extrinsic evidence.

A Proposal determined as not substantially responsive will be rejected by the Purchaser and may not subsequently be made responsive by the Offeror by correction of the non-conformity.

### 22. Evaluation and comparison of proposals

A two-stage procedure will be utilised in evaluating the proposals, with evaluation of the technical proposal being completed prior to any price proposal being opened and compared. The price schedule/ financial proposal of the Proposals will be opened only for submissions that passed the minimum technical score of 70% of the obtainable score of 650 points in the evaluation of the technical proposals.

The technical proposal is evaluated on the basis of its responsiveness to the Terms of Reference (TOR) and the Instructions to Offerors.

In the Second Stage, the price proposal of all contractors, who have attained minimum 70% score in the technical evaluation, will be compared. The **cumulative analysis scheme** will be applied with a total

score being obtained upon the combination of weighted technical and financial attributes. An Offeror's response to the solicitation document is evaluated and points are attributed based on how well they meet the defined desirable criteria. Cost under this method of analysis is rendered as an award criterion, which will be 35% out of a total score of 1000 of all the desirable factors of the RFP. The contract will be awarded to the offeror obtaining the highest cumulative score. The following formula will be applied in calculating the cumulative score:

$$B = T + \frac{C_{low}}{C} \times 350,$$

where

$T$  – is the total technical score awarded to the evaluated proposal;

$C$  – is the price of the evaluated proposal; and

$C_{low}$  – is the lowest of all evaluated proposal prices among responsive proposals.

### **Electoral background**

The parliamentary election was held in Moldova on 5 April 2009. The Party of Communists of the Republic of Moldova (PCRM) won a majority of seats (60 out of 101) for the third consecutive round. During the campaign and on the election day serious drawbacks were observed in the election process including: uneven access to the public audiovisual by all candidates, deficient system of electoral dispute resolution, inaccurate and non-transparent voter registration and lists verification processes, limited to no opportunities of voting from abroad and in the breakaway Transnistrian region, a fragile election results management system not owned by the election management bodies.

### **Voters' lists**

The integrity of the electoral list has been particularly questioned by observer groups and political parties. There have been allegations that this has led to multiple voting on many occasions. There were reports about multiple entries of electors, deceased persons on the list and the variable treatment of inclusion/exclusion of voters abroad.

A June 9 regulation of the CEC requires the local mayors to create the voters list for this election using their resources and information sources as well as a door to door program. This will create the preliminary lists. The preliminary lists will be displayed at the PEBs 20 days prior to the election for verification by the electors. The final day for updating of these lists is five days prior to the election. Any additions to the voters Lists and changes to the electors details during this period will be made to the preliminary list and form the final Voters Lists used on election day.

Supplementary lists: these lists are created on polling day at PEBs for those electors who can show documentation that proves they have the right to be included on the voters lists, absentee voters with appropriate documentation and voters at hospitals. Supplementary lists are also created on election day at each consulate and embassy of the RoM for those electors who vote there.

### **Early election**

The new Parliament did not elect a President after two repeated attempts and the President will dissolve the Parliament and announce new elections. The date of the event is possible to be as early as 26 July. In order to minimize the deficiencies of the previous event, and due to the unplanned nature of the early election in the times of state budget limitations, urgent actions are to be taken and supported accordingly. Additional resources will be required to support the civil society including media associations and the authorities with a primary focus on electoral management bodies.

## Intervention

The UNDP Electoral assistance program proposes to help the CEC inform Moldovan voters on the nature of this anticipated elections, the important dates the voters should know and remember (when is the election, where do they vote, how do they vote, and for what purpose). A specific emphasis will be put on the verification and correction of names on the voters lists through a strong media (and possible grassroots) campaign.

### **Communications objectives**

This campaign aims at informing the largest public that an anticipated election will be held on July 29<sup>th</sup>, and that several differences will occur in this election cycle as compared to a regular election. Messages will contain:

Time and date of the election; times and dates of voter registration (verification of voters lists, see below); location to register (see below); location to vote; documents required to vote; correctly marking the ballot (stamp procedure if regulation issued by CEC).

The second aim of the campaign is the verification of voters' lists in order to strengthen the integrity of the list. It should be clear that the list verification process is crucial to the transparency and enhancement of European democratic practices, and should involve all elections stakeholders. We would like to motivate eligible voters, institutions involved in the process (local government authorities, for example), political parties, civil society representatives etc to join in this collective effort for the sake of a clearer electoral exercise.

Measuring our communications success can be performed through number of material produced and distributed, number of PSAs produced and aired, hits on the voteaza.md website etc.

### **Key audiences**

Some audiences we seek to influence and motivate (youth, women and minorities) and others to inform (already involved in the electoral process, the elderly). The production company chosen by CEC and UNDP will be responsible for research and target identification.

### **Messages**

The main points need to be consistent and communicated in all our material produced, for clarity and focus. Slogans will be based on messages and created later. All produced material should be in the official language of the state and Russian.

#### Proposed messages:

- General: Anticipated elections will be held in the Republic of Moldova on July 29<sup>th</sup> 2009: not on a Sunday but on a weekday declared a non working day for the occasion, know where you vote, where and how you register to vote, how you will be voting.
- Your role as a responsible voter is to double check voluntarily whether your name is on the list and correct possible mistakes. To do this, you will have to (explain procedure, where to go, what ID to carry, and when to do it).
- Elections are more transparent and help bring us all together when the lists are corrected. Help us correct the voters lists of Moldova by doing your share.
