To assist in the examination, evaluation and comparison of Proposals, the Purchaser may at its discretion, ask the Offeror for clarification of its Proposal. The request for clarification and the response shall be in writing and no change in price or substance of the Proposal shall be sought, offered or permitted.

21. Preliminary examination

The Purchaser will examine the Proposals to determine whether they are complete, whether any computational errors have been made, whether the documents have been properly signed, and whether the Proposals are generally in order.

Arithmetical errors will be rectified on the following basis: If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected. If the Offeror does not accept the correction of errors, its Proposal will be rejected. If there is a discrepancy between words and figures the amount in words will prevail.

Prior to the detailed evaluation, the Purchaser will determine the substantial responsiveness of each Proposal to the Request for Proposals (RFP). For purposes of these Clauses, a substantially responsive Proposal is one which conforms to all the terms and conditions of the RFP without material deviations. The Purchaser's determination of a Proposal's responsiveness is based on the contents of the Proposal itself without recourse to extrinsic evidence.

A Proposal determined as not substantially responsive will be rejected by the Purchaser and may not subsequently be made responsive by the Offeror by correction of the non-conformity.

22. Evaluation and comparison of proposals

A two-stage procedure will be utilised in evaluating the proposals, with evaluation of the technical proposal being completed prior to any price proposal being opened and compared. The price schedule/financial proposal of the Proposals will be opened only for submissions that passed the minimum technical score of 70% of the obtainable score of 700 points in the evaluation of the technical proposals.

The technical proposal is evaluated on the basis of its responsiveness to the Term of Reference (TOR) and the Instructions to Offerors.

In the Second Stage, the price proposal of all contractors, who have attained minimum 70% score in the technical evaluation, will be compared. The **cumulative analysis scheme** will be applied with a total score being obtained upon the combination of weighted technical and financial attributes. An Offeror's response to the solicitation document is evaluated and points are attributed based on how well they meet the defined desirable criteria. Cost under this method of analysis is rendered as an award criterion, which will be 30% out of a total score of 1000 of all the desirable factors of the RFP. The contract will be awarded to the offeror obtaining the highest cumulative score. The following formula will be applied in calculating the cumulative score:

$$B = T + \frac{C_{low}}{C} \times 300,$$

where

T – is the total technical score awarded to the evaluated proposal;

C – is the price of the evaluated proposal; and

C_{low} – is the lowest of all evaluated proposal prices among responsive proposals.

a) **Tender's Objective:** Selection of a specialized company to organize and carry out a training programme for participants of the Working Groups on negotiation process through period of April – December 2010 (**8 targeted trainings; 4 working days each training session**);

b) **Background:**

The project has the overall objective of strengthening the institutional capacity of the Ministry of Foreign Affairs and European Integration so that it can exercise its functions in a more efficient manner, operate transparently and fulfill its European Integration commitments. The project component (**Capacity Development of Moldovan Public Authorities for European Integration**) is aiming to develop capacities of Moldovan institutions in relation to EU Integration, with immediate focus on negotiating the Association Agreement with the European Union and implicitly its implementation. Assistance shall focus on: creation of the appropriate institutional capacity within the Moldovan public administration; strengthening the national negotiation and expertise individual capacity; development of the implementation capacity.

On January 12, 2010 in Chisinau took place the first round of negotiations on the Association Agreement between the European Union and the Republic of Moldova. The negotiating parties were divided in four thematic **working groups** as follows:

- I. **Political Dialogue and Reform, Co-operation in the field of Foreign and Security Policy;**
- II. **Justice, Freedom and Security;**
- III. **Sectorial Co-operation;**
- IV. **People to People Co-operation.**

Thus, particular attention is given to improving the individual level expertise needed for the negotiation and the implementation of the Association EU-Moldova Agreement. Institutions involved in the negotiations process need individual level capacity development actions, including but not limited to negotiation skills, thorough knowledge of the *acquis communautaire*, analytical expertise to effectively handle large volumes of information regarding the national interests and positions as well as the institutionalised competence of individual actors to identify eventual gaps in capacities. The aim is to make available a pool of experts in the public administration institutions who are well equipped to conduct negotiations, well aware of EU guidelines, rules and procedures in their particular field of work, know well the Moldovan context and what it needs to do in each particular field (area) in order to be in line with EU regulations, and ultimately be well motivated to continue serving as civil servants.

Quick assessments of the individual capacities of the relevant personnel dealing with EU issues have given several indicators that room for improvement exists. Targeted training, studying courses and personal coaching as well activities to improve the institutional memory can narrow the gap between the country's needs in terms of negotiation and implementation capacities and the demand for further rapprochement to the European Union.
