### **20. Clarification of proposals**

To assist in the examination, evaluation and comparison of Proposals, the Purchaser may at its discretion, ask the Offeror for clarification of its Proposal. The request for clarification and the response shall be in writing and no change in price or substance of the Proposal shall be sought, offered or permitted.

### **21. Preliminary examination**

The Purchaser will examine the Proposals to determine whether they are complete, whether any computational errors have been made, whether the documents have been properly signed, and whether the Proposals are generally in order.

Arithmetical errors will be rectified on the following basis: If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected. If the Offeror does not accept the correction of errors, its Proposal will be rejected. If there is a discrepancy between words and figures the amount in words will prevail.

Prior to the detailed evaluation, the Purchaser will determine the substantial responsiveness of each Proposal to the Request for Proposals (RFP). For purposes of these Clauses, a substantially responsive Proposal is one which conforms to all the terms and conditions of the RFP without material deviations. The Purchaser's determination of a Proposal's responsiveness is based on the contents of the Proposal itself without recourse to extrinsic evidence.

A Proposal determined as not substantially responsive will be rejected by the Purchaser and may not subsequently be made responsive by the Offeror by correction of the non-conformity.

### **22. Evaluation and comparison of proposals**

A two-stage procedure will be utilised in evaluating the proposals, with evaluation of the technical proposal being completed prior to any price proposal being opened and compared. The price schedule/financial

proposal of the Proposals will be opened only for submissions that passed the minimum technical score of 70% of the obtainable score of 700 points in the evaluation of the technical proposals.

In the first stage the technical proposal is evaluated on the basis of its responsiveness to the Term of Reference (TOR) and the Instructions to Offerors.

In the Second Stage, the price proposal of all contractors, who have attained minimum 70% score in the technical evaluation, will be compared. The **cumulative analysis scheme** will be applied with a total score being obtained upon the combination of weighted technical and financial attributes. An Offeror's response to the solicitation document is evaluated and points are attributed based on how well they meet the defined desirable criteria. Cost under this method of analysis is rendered as an award criterion, which will be 30% out of a total score of 1000 of all the desirable factors of the RFP. The contract will be awarded to the offeror obtaining the highest cumulative score. The following formula will be applied in calculating the cumulative score:

$$B = T + \frac{C_{low}}{C} \times 300,$$

where

$T$  – is the total technical score awarded to the evaluated proposal;

$C$  – is the price of the evaluated proposal; and

$C_{low}$  – is the lowest of all evaluated proposal prices among responsive proposals.

#### “Feasibility study on on the creation of Euroregion Nistru”

---

**Job Title:** Specialized company/NGO providing a group of consultants to undertake a “Feasibility study on the creation of Euroregion Nistru, involving districts from Ukraine, Moldova and the Transnistrian region of Moldova”

**Contract type:** Institutional Service Contract  
**Duty Station:** Moldova, with extensive travel in the Transnistrian region  
**Duration of assignment:** March – November 2010  
**Contracting Authority:** UNDP Moldova

#### 1. GENERAL BACKGROUND

Political settlement of the Transnistrian conflict is a longer-term goal and the status quo is likely to endure for some time. Focus has been on political issues, which are frequently beyond the reach of the sides and are difficult to resolve in the short- to medium-term. Non-political instruments and measures at the level of communities and local authorities, which could bring the sides closer to each other, have been neglected until now.

The Euroregion concept has already proven to be an effective solution in several politically frigid atmospheres (for instance in the Hungary-Slovakia-Ukraine relations in the early 1990’s). In Europe there are around 300 Euroregions based on a concept developed by the Council of Europe.

However, the concept was not yet tested in frozen conflicts like the Transnistrian one. Nevertheless, the creation of a Dniester Euroregion, which would include at least one district of the Transnistrian region of Moldova, might offer the basis for further cooperation between the sides and become a strong confidence building measure (CBM), having positive spill-over effects.

The framework of regional cooperation in the form of a Euroregion, to include northern districts of Moldova, western districts of Ukraine, as well as some districts of the Transnistrian region, can give a significant impetus to the reintegration of Moldova and will enhance the confidence between the two banks of Nistru river, also taking into account the confidence-building potential of the non-political cooperative efforts by Moldovan and Ukrainian central authorities.

#### 2. SPECIFIC CONTEXT

On February 24, 2009 the statutory conference of the Nistru Euroregion took place in Soroca, Moldova. The event was organized by the Ministry of Local Public Administration of the Republic of Moldova in cooperation with the Embassy of Ukraine in the Republic of Moldova and the Embassy of the Republic of Hungary in the Republic of Moldova. The conference was attended by delegates of five Moldovan districts (Floresti, Soldanesti, Soroca and Camenca from the Transnistrian region) and Vinnitsa county of Ukraine who are the potential actors of the cooperation.

The confirmed goal of the representatives from the involved districts is to create a Euroregion Nistru which could provide an official frame for regional cooperation. Both Moldovan and Ukrainian sides

agreed that there is a strong need to receive necessary technical assistance in setting up the legal and institutional structure of the Euroregion.

Representatives of the international community considered the idea of the Euroregion Nistru as an excellent initiative which could not only enhance the cooperation among the parties but through direct involvement of Transnistrian side would also be a significant contribution to the CBMs via implementation of concrete projects.
