

Clarification Questions and Answers (as of 09/08/2011)

Q1: On which software basis should Hypervisor be deployed, what kind of support is required, what term of license is required? [Item 1]

A1: [Microsoft Windows Server 2008 R2 Enterprise x64.](#)

Q2: Can we offer no built-in network card (2x 10GbE), but installed in PCI-Ex slot? [Item 1]

A2: [Yes, the solution will be accepted.](#)

Q3: Could you please confirm quantity of processor in the server?

A3: [1 \(one\).](#)

Q4: RAID adapter with 512MB cache is an expensive option and is required in only specific HW configuration with several hard disks. For simple mirroring of two disks e.g. less expensive adapters without cache and battery are used. Tender specification contains only one low-end hard disk for which expensive RAID adapter option is not required. Could you please clarify HDD and RAID configuration (number of disks, planned RAID levels)?

A4: [RAID adapter option is required. It is planned further to add hard disks.](#)

Q5: Could you please clarify the requirement of trade-marked Dell ReadyRails(TM) rack mounting accessories?

A5: [Similar solutions will be accepted.](#)

Q6: Industry-standard number of internal USB ports (used for loading virtualization engine from a flash key) is one. Could you please confirm that one internal USB port is acceptable?

A6: [Yes, one internal USB port is acceptable.](#)

Q7: Could you please confirm total number of Ethernet ports: two 10Gb and four 1Gb ports? Could please clarify how 10Gb ports will be used and which transceiver type should be proposed for them?

A7: [2 x 10 GbE + 1 x GbE.](#)
