Clarification Questions and Answers
RfQ13/00697
(as of 15/08/2013)

1. **Question:** *Is automatic duplex needed for these printers?*
   Answer: Yes

2. **Question:** *Is it acceptable to offer printers equipped with 32MB of RAM? While other parameters remain unchanged, a larger amount of RAM does not give any advantage of performance boost.*
   Answer: Yes, the technical specifications will be reconsidered and please see the amended minimum requirements.

3. **Question:** *The requirement of one additional high-capacity cartridge. Not all printers support both standard and high-capacity cartridges, some have only standard cartridges available. Is it acceptable to offer additional cartridges of standard capacity, explicitly indicating their capacity (e.g. 2200 pages at 5% coverage)?*
   Answer: Yes, but the proposed cartridge shall be the highest capacity cartridge available for the proposed printer.
